## FOOT DISPENSER SANITIZING UNIT

The purpose of manufacturing this Foot Operated Hand Sanitizer Dispenser is to control the spread of virus from an infected person to other while using the same sanitizer bottle. With the help of this sanitizer dispenser, the sanitizer could be used without touching the bottle with hands. By pressing the pedal with a foot, the bottle would dispense the liquid.

This device is mainly designed for use in public areas like, hospitals and big companies, where a large number of workers are employed.

**MOQ:5 pcs.**
